

Adtraxion Manager

The Adtraxion Manager in combination with the Adtraxion Player are the core elements of the Adtraxion Digital Signage Solution. The Manager is a very user-friendly software package to create play out sequences, scheduling, distribution and monitoring to the players.

The Adtraxion Manager offers solutions from a single user environment to a fully multi user, and multi location environment.

The Adtraxion system can be centrally managed from a single location/person but the extensive user right settings also allow multiple users to take limited or full control of the system.
