

## Adtraxion X3 Player

With the in-house developed Adtraxion X3 Player, Adtraxion Systems offers a dedicated digital signage playback device, with unique benefits. The Adtraxion X3 Player is a key component in the Adtraxion digital signage solution. Through its great performance, support of several content formats, and low power consumption, the Adtraxion X3 player is capable of fulfilling the most demanding digital signage needs.

### 24/7

The Adtraxion X3 player is a robust and high performance Adtraxion player, specially developed for digital signage applications. The combination of dedicated soft- and hardware makes the Adtraxion X3 player a compact and highly reliable 24/7 system component.

### Green

The Adtraxion X3 player offers great performance and possibilities, and still remains a low power consuming device. The X3 Player consumes 70% less power compared to an average PC. Another attractive power saving quality is applied when no active playlist is scheduled; the Adtraxion X3 Player will automatically go into idle mode and signals the display to turn off, making also the display a less power consuming device!

### Safe and secure

With the high level network security and the extensive monitoring capabilities you are always in control over your Adtraxion network. The security is supported through dedicated firewall settings, whereas the communication is encrypted and Adtraxion makes use of a propriety protocol. These features will secure safe communication and prevent unauthorized network access.
